

Responsibility

1. Are you responsible for others? Explain why or why not.

I think I'm normal. I'm not good at responsible but I try. I know I need to get responsibility in my whole work.

2. Personally, how important is it to help your friends?

It's very important. Because if I help someone that really need help when I need help he/she will help me either. It means correlation.

3. Practically, how can you have responsibility in this community? That includes the dorm, your class and at school in general.

In the dorm, most important things are rules. We must follow and obey those rules because we need to respect each other. And also before we made our rules we promise it and then made it.

4. Write a self-reflection on the relationship between respect and responsibility.

If I have a responsibility I need to respect everyone. For example, if I join group project with my friends I have to do my work be on time and that is my responsible. And that is respect members of my team. Like this it is relationship between respect and responsibility.

5. Include these numbers into a self-reflection.
